## SPECIAL REPORT

Sunspot Cycle 22

The accelerating pace of the current sunspot cycle slowed in May, as the average sunspot number for the month dropped to 59.7, from 88.0 in April, 1988. Similar variations are common on a month-to-month basis, as the graph below shows.

Although the average sunspot number dropped for May, the  $\underline{13\text{-month smoothed}}$  sunspot number for November,  $\underline{1987}$ , increased to 46.7, from 43.6 the previous month. The smoothed sunspot number is still ahead of the pace of any other sunspot cycle, even the legendary Cycle 19.

The next six months will tell us a great deal about Cycle 22. If the sunspots continue to increase at an accelerating pace for the rest of 1988, we will be well ahead of Cycle 19, and be enjoying on a daily basis the fantastic conditions we had in early June.

The Space Environment Services Center predicts that the smoothed sunspot number will increase to 100 by July 1988, and to 170 by mid-1989. [Because the 13-month smoothed sunspot number includes six months before and after the month in question, we cannot compute smoothed figures until six months after the month. We won't know the figure for July 1988 until the end of the year.]

### Sunspot Numbers Raw Data

The SESC also predicts a dramatic increase in the number of solar flares over the next year. During the past year, we suffered through an average of fewer than five flares per month. The SESC predicts an average of 30 flares per month over the next year.

## **AWARDS**

You Don't Tie Up At A DOK! By Ted Melinosky K1BV

You don't because DOK stands for Districts/ Ortver-bands Kenner, or Districts Area Locator in German. Look at a typical West German QSL. In almost every case, you will see a notation such as "DOK FØ9". This is a geographical indicator (mostly), somewhat like the USA county system. It is also the basis for a large number of West German awards.

Most active DXers have large numbers of DL cards and probably have earned several of their awards that are based on contacts with hams in different DOK's.

Keeping records of your DOK's requires an effort at first, but is well worth the work. I use a simple method of taking one  $8\ 1/2\ x$  11 page and mark the top right for each letter of the alphabet. I then number in 2 columns on the page 01 to 40 and 41 to 80. Then pick up your first German card and start. If DA1SB is F09, turn to the F page, and opposite the 09, write the call. Then keep your records up to date as batches come in from the Bureau.

The premier award involving contacts with DOK's is the DLD, sponsored by DARC. There are many levels of this award, starting at 100 DOK's and going up to 1000. This award, like the Worked All Britain, can be a lifetime achievement goal. A special application is required and it is suggested you write to the current sponsor for full rules and forms: H.P. Guenther DL9XW, Am Strampel 22, D-4460 Nordhorn, W.Germany.

Three of the many DOK based awards are:

Toepfer Diploma. Contact 6 stations in DOK K31 after 1 November 1975. No mode or band restrictions. GCR list and DM5 or 10 IRC's to Rudi Haus DK6WD, Altstrabe 24, D-5522 Speicher, West Germany.

Zollern Alb Award. Contact stations in DOK's P30, P34 and P44 after 1 Jan 1979. Europeans need 6, others need 3 on HF. On VHF, 10 are needed. Required contact with DLOAZ which counts for two of the needed QSOs. SWL OK. GCR list and US\$3 or 7 IRC's to: Peter Muschialik DL4GT, Olgastrasse 24, D-7474 Bitz Wurtt, W. Germany.

Worked All Frankfurt. Make contacts in Frankfurt, DOK FØ5 since 1 Jan 1960. Each such QSO counts for 1 point and station DLØWO counts 5 points. Germans and others Europeans need 25 points; rest of world needs 15. Issued in 5 versions, Short-Wave: CW, phone or mixed, VHF: SWL or RTTY. Free to blind and disabled amateurs. GCR list and DM5 or 10 IRC's to J. Hillman DL6QX, Pfungst-Str. 3, D-6000 Frankfurt/M, West Germany.

[K1BV publishes the K1BV DX Awards Directory. The 1988 edition of the Awards Directory includes rules for over 830 awards from 99 DXCC countries. The 200+-page directory costs \$14.35 including surface postage (CT residents add \$1.08 sales tax) from Ted Melinosky K1BV, The K1BV DX Awards Directory, 525 Foster Street Suite 1001, South Windsor CT 06074 USA. For DX stations, costs are US\$13.75 by surface mail, or US\$18.00 by airmail.]

# **QSL Information**

#### QSL Help Wanted

- FB8XY for K7XN. A card to the address in Issue 425 was returned "Not at this address," any help?
- P4A and 5U7LD for W8RT.
- DX9HT EA6VQ GV2WMR IO4WMR 4X8T 5N2KRC and 6YAA for KJ4BK.
- 3B9CD March 1985 for KUØA. No answer from 3B8CD.
- TN8BU Apr 1969, Z21FR Dec 1982, YT3C May 1983, PI4KST/4 May 1985, 8J8IYY Jun 1985, and YZ9A Oct 1985, for W7CRT.
- FB9WK Nov 1983, for KØCVD. Mail returned from Box 190, Mazamet.
- W5BE/HR6 Nov 1982, for JH1IFS.
- VP8BGA for KI6YE.
- and OHØ/DL7AKC Apr 1987 for WB8SFF. No answer from DL7AKC.

#### QSL Help Offered

- ET2US's op in 1962 was Dick Cormier.
- CR7CI was Antonio Luiz Figueriredo, Aeroporto DETA, Box 276, Loreko Marks.
- VR1B was Charles Hawker. QSL via VK2EG.
- VS6EY is Victor Kershaw, 4 Hampshire Road, Kaloon Tong, Hong Kong.

#### QSL Notes

- QSL 4K1A via UA1DJ, Boris V. Gnusov, Box 1, Leningrad 196070, USSR,
- Art ZL2HE reports he is QSL manager for: ZL2BKM/C ZL7BKM ZL5BKM ZL5MC ZL4DE/C ZL2BCF/A ZL1BIQ/K ZL3AFH/A, but not ZL8AFH. QSL all to A.E.Law, R.D.2, Dannevirke, New Zealand with US\$1, 3 IRCs or mint stamps. Please spell town correctly.
- KA1XN still has no logs from A4XKC, so he can't answer cards. No need for second (nor third) request for cards. A4XKC has promised logs "soon."
- KH2F says DXers who cannot wait for cards via QSL manager N2AU can QSL direct to 28046 F Street, APO San Francisco CA 96334.
- LU8DPM, QSL manager for many South American stations such as LS1E LU2E AY2E CX2DC ZPØJCY and others reports that he has not received any cards via the bureau system in more than two years. If you need a card from LU8DPM, please QSL direct.

QSL Information Corrections

• V85AA is not via WØZV, according to WØZV.

• QSL manager of YB8ASX is KØIEA, not KEØOL.

DXers Postal Service Ends

Ron WP2ADC has ended his DXers Stamp Service, as he can no longer finance the \$20/week\$ the service was losing.

Photographic QSL Card Printers

Photographic Concepts QSLs will print photographic QSLs cards for only \$36/100 in small quantities, plus typesetting, etc. They'll pay the \$15 typesetting charges on orders received before June 30. Contact them at Box 6144, Bossier City LA 71171, or call (318) 747-1968.

For those needing QSLs in larger quantities, contact Everett Jackson Jr. WA8CZS, Franklyn Printing Co., 2775 Maple Ave., Zanesville OH 43701 (614) 452-6375. Typical costs are \$300 for 3,000 cards, or \$800 for 25,000 cards, full four-color process.

#### Old Bureau Cards

What ever happens to QSLs for amateurs who are not members of their local radio society? In many countries, these cards are not delivered to the amateur. Some countries are kind enough to return these to the sender suitably marked. However, J. Balu VU2JBU reports finding lots of old photographic QSLs in a used paper market in Delhi, mixed in with old postcards.

#### SØRASD QSL Cards

The Lynx DX Group has generated a lot of mail over their QSL policies. QSL bureau workers report stacks of SØRASD cards being returned via the bureau system, even those cards that had donations or direct postage enclosed. Cards are returned in the SAE sent, but without postage. One DXer wrote, "Am I wrong to feel cheated? Instead of the airmail reply I paid for, I received a 2-month ride piggy-backed in my own bureau envelope." [Perhaps this policy wouldn't have angered so many DXers if it had been announced beforehand, and if provisions had been made and publicized for direct return of QSLs. -ed.]

The SØRASD QSL managers also seem to have a problem with 160 meters. One avid Low Bander received his first 160-meter SØRASD card marked "18 MHZ." The card was returned to EA3AOD, whose call appeared on the envelope, with an explanation in Spanish about 18 vs. 1.8 MHz for 160-meter DXCC. Two weeks later a card arrived for 1840 MHZ! A third try resulted in a card for 18 MHz, corrected in contrasting ink to 1.8 MHz. Maybe DXCC Administrator Don Search will be understanding...

#### A DX Station's Lament

#### Dear The DX Bulletin:

I am a little perplexed by the habits of the DXers who are so anxious to make DX contacts to get new countries and/or new band-countries, yet they don't send any postage or insufficient postage, much less something extra to cover the costs of the cards themselves. It seems to me that anyone who really wants a card should send a Green Stamp (US\$1), 2 IRCs, or the equivalent in stamps of the country where the QSLs are being processed. This just about pays for the postage and printing.

I am not asking for help with expenses for my trips to T30MA, KX6/KV4AM, and VP2EMA, but I don't think it is asking too much for a Green Stamp, 2 IRCs,

or the equivalent.

I do not fault the 10-15% of DXers who seem to understand and already respond in the above manner: the Europeans, South Americans, and most of the Japanese.

(s) Mac McBirney KV4AM

"... (click) ... just turned on the ALPHA ... ?

# ALPHA-The Serious Operator's Choice

Contesters take their amateur radio very seriously. Success in long weekends of tough contesting demands a big signal and outstanding equipment reliability—exactly what every **ALPHA** linear amplifier is designed and built to deliver.

Respondents to the NATIONAL CONTEST JOURNAL 1988 Reader Survey do a lot of operating and they tend to favor the big, intensively competitive DX contests. They average over 12 years of operating experience and 89% hold Extra Class licenses. You'd expect them to prefer ALPHA amplifiers.

But even we were surprised at the extent to which these top operators choose ETO/ALPHA over all other amplifier brands (see table).

# Table 4—Comparison of HF Amplifier Manufacturers

NCJ Survey 1988 vs 1981

Manufacturer	1988	1981
Home-brew	23%	17%
ETO-Alpha	21%	17%
Heathkit	20%	37%
Dentron	7%	13%
Drake	6%	-
Ameritron	5%	-
Henry	4%	3%
Amp Supply	3%	_
Other	11%	4%

Table and operator statistics excerpted with permission from March/April 1988 issue of the NATIONAL CONTEST JOURNAL, published by the American Radio Relay League, Inc.

You don't have to be a contester or a DXer to enjoy the benefits of owning an *ALPHA*. If you appreciate fine equipment—if you want maximum legal power available whenever (and for however long) you need it—if you want quality and a factory warranty that takes the worry out—isn't a new *ALPHA* just what you need?

Call or write ETO for a full color ALPHA brochure and delivery information, plus a free reprint of the complete NCJ 1988 Reader Survey.
